
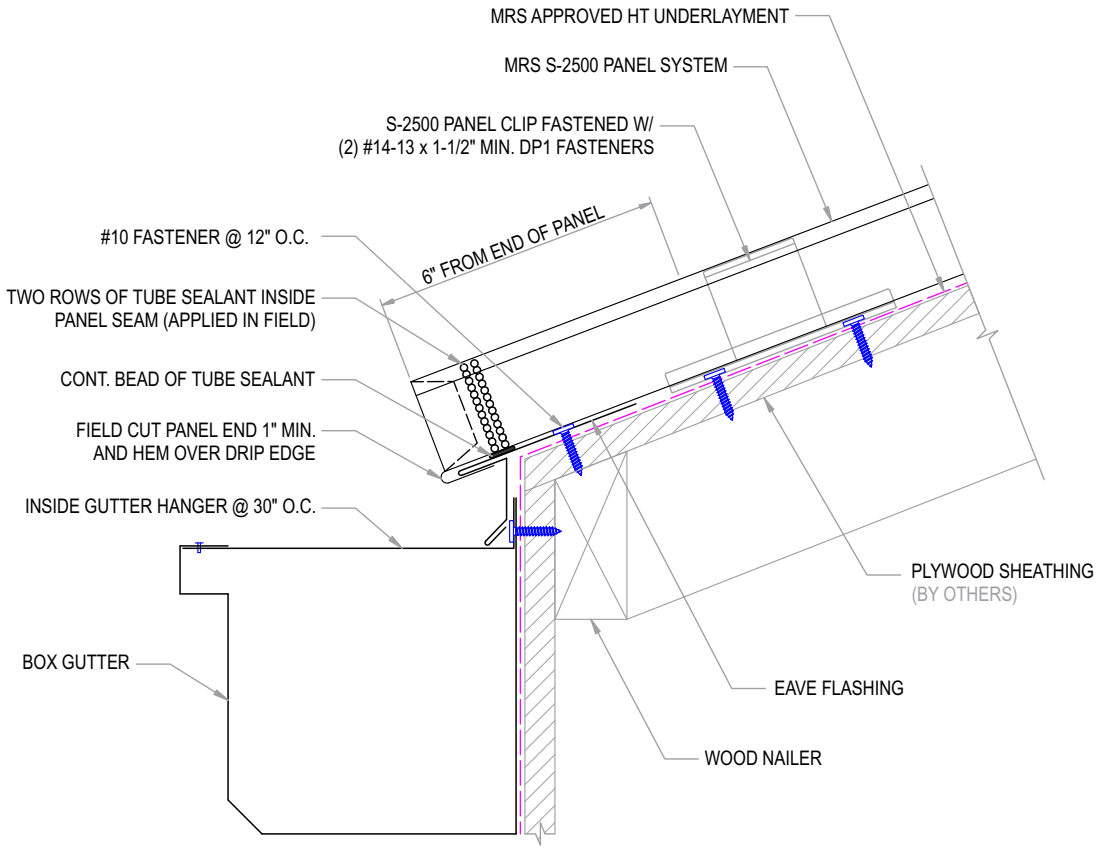
- Minimum Hem: 1" for panel lenghts ≤ 30'-0".

  Longer Tee bends may be required based on material, temperature and geographical location. Contact MRS for expansion confirmation for long-length panel applications.



GENERAL NOTES

1. Clip and fastener spacing per project specific engineering (Engineering required for WTW projects).
2. Clip fasteners to provide 1" minimum or full thread embedment.
3. Panel seam type (single lock or double lock) shall be determined by project requirements.
4. Additional gutter support may be required based on project requirements.
